Blue text indicates additional details are available. Click the text to display additional information.

Qualifiers applied to similar operations that result in different labor times required to complete the repair.

Displays a list of related labor operations relevant to the search criteria or filters applied.

Refine labor search results by filtering by vehicle System and/or System Group.

FleetCross Quick Reference Guide

Labor Details screen displays labor operation information for the selected vehicle and operation, including labor times and repair-related notes.

Current Vehicle Information:

Displays the Year, Make, Model & Engine (YMME) of the selected vehicle; click the blue hyperlink to choose a different vehicle.

The screenshot shows the FleetCross Labor Details interface. At the top, a blue header contains the MOTOR logo and 'FleetCross'. Below this, a white bar displays the selected vehicle: '2021 Freightliner Cascadia 12.8L L6 (DD13) Turbocharged DIESEL FI'. To the right of the vehicle information is a search bar labeled 'Search FleetCross - Labor'. On the far right of the header are navigation icons for Parts, Catalogs, Labor (selected), and Service. Below the header, the main content area is titled 'Labor Details' and shows 'Air Brake Camshaft R&R' as the selected operation. A left sidebar lists the hierarchy: System (Brakes), Group (Air Brake System), and Sub Group (Air Brake Components). The main area is divided into 'Attributes' (Front) and 'Operations'. The 'Operations' section contains a table with columns for 'OPERATION', 'LABOR NOTES', and 'HOURS'. The table lists 'Air Brake Camshaft R&R Front - General' with a detailed labor note and two time entries: '(One Side) 2.0' and '(Both Sides) 3.3'. Callout boxes provide instructions: one points to the vehicle information and a 'Back To Results' link; another points to the 'Back To Results' link and the search bar; a third points to the 'LABOR NOTES' column; and a fourth points to the 'HOURS' column.

Return to the original list of Labor Operations Results by clicking “Back to Results,” or use the search box to perform a new search.

Labor Notes provides specific details about the operation and outlines what is included or not included in the calculated labor time.

Indicates the labor time required to complete the operation; multiple times may be shown depending on the selected operation.
